Speech data collection Services

Build your natural language processing (NLP) and automated speech recognition

Speech data collection Services

PhDAssistance provides speech data collection services where our experts collect high-quality language data to ensure your system can understand and respond to human speech. PhDAssistance offer following natural language utterance collection through smartphone app, or centralized on-site recordings. We collect wide types of speech collections including text corpora, speech modality, prompt variation, single/multi-speaker, telephony, and embedded device.
